PROFILE

M.Sc. Computer Engineering student at the University of Duisburg-Essen with practical experience in full-stack software development and LLM-based applications. I have my target set on becoming a competent engineer who can use my skills and knowledge to bring positive impact on the world. Available for work student software development roles from September 2026, up to 20 hours/week.

EDUCATION

University of Duisburg-Essen | M. Sc. Computer Engineering – Profile: Intelligent Networked Systems October 2025 – Present
○ **Grade:** 1.6 (German scale), 36/120 ECTS

University of Duisburg-Essen | B. Sc. Computer Engineering – Profile: Software Engineering October 2022 – September 2025
○ **Grade:** 1.2 (German scale)
○ **Achievements:** Deutschlandstipendium 2024/25, Deutschlandstipendium 2023/24

WORK EXPERIENCE & PROJECTS

Student Research Assistant | University of Duisburg-Essen January 2026 – Present
○ Co-authored a research paper, publication pending
○ Collaboration on a research project regarding the use of large language models in prescriptive business process monitoring

Hybrid Prerequisite Knowledge Graph Generator | University Course Project October 2025 – February 2026
○ Designed and implemented prerequisite knowledge graph generator software combining NLP rules with LLMs, resulting in better accuracy and F1-scores compared to traditional NLP method baselines
○ Worked together with team members and supervisors

Software Developer Intern | adesso SE Düsseldorf April 2024 – July 2024
○ Collaborated effectively with team members to plan and build software projects
○ Developed a backend server for an AI use case generator, capable of identifying 5+ improvement areas and suggesting 3+ AI use cases for each area with respect to client company profile
○ Automated Microsoft Forms response data extraction, parsing and transfer using Microsoft Power Automate
○ Implemented programmatic report and diagram generation in various formats (PDF, pptx)
○ Engaged in self-learning and practical exercises focused on Java programming, Spring Framework / Spring Boot, RESTful Architecture, and Prompt Engineering

Academic Tutor and Lab Assistant | University of Duisburg-Essen October 2023 – February 2024
○ Taught and assisted students during weekly tutorial sessions for the courses Fundamental of Computer Engineering and Mechanics 1, answering questions and providing clear and accurate explanations on the course topics
○ Led and supervised weekly Lab sessions in English and German for the course Fundamental of Computer Engineering (Grundlagen der Technischen Informatik), assisting 60+ students each week in completing the given tasks and homework by answering questions, explaining concepts and pointing out mistakes

SpoTube Chrome Extension | Personal Project September 2023
○ Built a fully-functioning Chrome Browser Extension that grabs the titles and artists of up to 50 songs from a Spotify playlist, uses them to search for their matching YouTube videos and generates a YouTube playlist from them, all with the click of a button
○ Demo and code can be found in my portfolio GitHub repository <https://github.com/vincent-dennis/portfolio>

SKILLS & LANGUAGES

Programming languages, frameworks, technologies:

- Python 3
- Flask, Django
- Java
- Spring Framework, Spring Boot
- C/C++
- Git
- HTML/CSS, JavaScript
- SQL
- Docker

Languages:

- English (Bilingual, Band 8.5 IELTS)
- German (B2 CEFR)
- Bahasa Indonesia (First Language)
